TAKE A CLOSER LOOK AT BETTER LIGHT

4x5 Digital Scanning Inserts for Superior Images in Commercial, Catalog and Reprographic Applications

For Studio or Location
Use Mac desktop or laptop computers or PC* with Windows or NT system. Industry-standard SCSI-2 connection.

Total Control of Curves
No preset manipulation of image data that restricts detail in highlights or shadows.

Four Models...All with Superb Image Quality
Pick the one that fits your file size & budget needs. All models are upgradeable.

Dedicated Disk Drive
Convenient storage that assures non-stop, vibration-free scanning.

Capture the Best File Size for the Job
Unique pixel averaging technology actually improves smaller files.

Sensitivity up to ISO 3200
Use any resolution setting at any ISO setting...no exceptions.

The "Black Box"
Contains electronics and disk drive to optimize speed and minimize size and weight of insert.

Digital Focus Verification
Easy to use, extremely accurate focus tool assures perfect sharpness, measured in any or all colors.

Proprietary High-Speed Cable
Moves image data at speeds up to 500 MB per minute. 15 ft. or 25 ft. cable without boosters.

Kodak Tri-Linear CCD
The very best available, used in all Better Light models for smooth, 1-pass RGB imaging.

Fastest Scan Times (Really!)
Patented architecture makes our "real-time" scans faster than the competition.

DIMA DIGITAL CAMERA SHOOT-OUT — WINNER

It takes more than pixels to produce exceptional digital images.
