

CONVENIENCE ON LOCATION WITH OUR PORTABILITY OPTION

Use any model of Better Light scanning camera on location, with or without AC power. The complete Portability package consists of a custom, cushioned carrying case with internal dividers and a special holder for the scanning camera insert, plus a high-capacity, rechargeable battery.

In addition to holding the camera insert, control unit, and battery, the Portability Option carrying case allows a laptop computer to be stored and protected, including the latest Macintosh Powerbook models. Wraparound handles and a removable, padded shoulder strap are included. The unique case design allows camera components to be left connected to each other for rapid setup, and the entire system may be operated without removing the control unit from the carrying case. On location, the user needs to simply connect the proper SCSI cable between the control unit and Powerbook laptop, remove the camera insert from its holder and place it in a view camera to begin capturing high-quality digital images.

The Portability Option's rechargeable battery provides a minimum of three hours of shooting time, and is automatically recharged whenever the camera control unit is plugged into AC power. The battery's "care-free" design allows it to be left connected indefinitely without overcharging and its lead-acid "gel cell" technology is safe for airline transportation. The memory effects of other battery types are absent from the Portability battery, which has a reliable lifetime of 500 to 1,000 charge/discharge cycles.

The Portability Option requires a SCSI cable to connect the Powerbook's SCSI connection to the camera insert's HD-50 SCSI-2 (high density 50-pin) cable connector. This type of cable is typically supplied with the PCMCIA SCSI adapter now required to provide a SCSI connection with the newer Powerbooks and PC laptops.

Dimensions of Case: 14.5" wide x 16" high x 8" deep.
Weight: 25 to 27 pounds loaded with battery, control box and insert, plus a laptop computer. Battery alone weighs 7 lbs.

The Better Light Portability Option has a suggested retail price of \$525 US. (Apple Powerbook not included).
